

SANYO TROUBLESHOOTING GUIDE 2011 MODELS DP32640-11 / DP32642-00

This guide is divided into 4 sections/pages depending on type of defect:

page 1)No Green LED Power Light.(LED never turns“ON”)

page 2)Green LED Light is “ON”, but Backlights are not “ON”,or only turn“ON & then OFF”.

page 3)Green LED Light is “ON”,and Backlights are “ON”,but there is no video/OSD.

page 4)Green LED Light turns “ON”, but turns “OFF”within 10 seconds.

Please select the section/page that matches your defect and follow the flow chart.

These models & chassis versions are in this guide:

DP32640-11

DP32642-00

PLEASE KEEP THIS GUIDE.

IT WILL NOT BE PROVIDED FOR EVERY REPAIR.

techsupport@sanyotv.com

Repair Flow Chart: Trouble Condition

Green Power LED does not turn on. The TV is dead.

(TABLE *1.0) Analog board:5VSTB Test Points

32" Models	5VSTB on analog board	Confirmation Voltage
DP32640-11	N8LA	
DP32642-00	Z6TE	5V

(TABLE *2.0) Power board:5VSTB Test Points

32" Models	5VSTB on power board	Confirmation Voltage
DP32640-11	N8LA	
DP32642-00	Z6TE	5V

(TABLE *3.0) Digital board:5V_STBY

32" Models	5V_STBY on analog board	Confirmation Voltage
DP32640-11	N8LA	
DP32642-00	Z6TE	5V

Repair Flow Chart:Trouble Condition

Green Power is on, but LCD backlights are not on.

Backlights do not turn on, or only turn on and back off.

Repair Flow Chart: Trouble Condition

Green Power LED and LCD backlights are ON, but no video or OSD.

(TABLE*1.0) Main board: "LVDS Clock" Test Points

32" Models	LVDS Clock on digital board	
DP32640-11	N8LA	K5LV Pin#26 clock+
DP32642-00	Z6TE	K5LV Pin#28 clock-

Note: The bandwidth of the oscilloscope and probe must be at least 100MHZ or higher to check if the clock pulse exists.

Repair Flow Chart:Trouble Condition

Power LED turns OFF within 10 sec of power ON.

SANYO

FILE NO.

SERVICE MANUAL

Remote Control Digital Color Television

**DP32640 (U.S.A.)
(CANADA)**
ORIGINAL VERSION

Chassis No. P32640-11

NOTE: Match the Chassis No. on the unit's back cover with the Chassis No. in the Service Manual.

If the Original Version Service Manual Chassis No. does not match the unit's, additional Service Literature is required. You must refer to "Notices" to the Original Service Manual prior to servicing the unit.

Servicing should be performed by only trained and qualified service personnel.

WIDTH	800mm
HEIGHT	559mm
DEPTH INCLUDING BASE	241mm

SAFETY INSTRUCTIONS

SAFETY PRECAUTIONS

WARNING: The chassis of this receiver has a floating ground with the potential of one half the AC line voltage in respect to earth ground. Service should not be attempted by anyone not familiar with the precautions necessary when working on this type of equipment.

The following precautions must be observed:

1. An isolation transformer must be connected in the power line between the receiver and the AC line before any service is performed on the receiver.
2. Comply with all caution and safety-related notes provided inside the cabinet, on the chassis, and on the back.
3. When replacing a chassis in the cabinet, always be certain that all the protective devices are installed properly, such as control knobs, adjustment covers, shields and barriers.
4. Before replacing the back cover of the set, thoroughly inspect the inside of the cabinet to see that no stray parts or tools have been left inside.

Before returning any television to the customer, the service technician must perform the following safety checks to be sure that the unit is completely safe to operate without danger of electrical shock.

ANTENNA COLD CHECK

Remove AC plug from the 120 VAC outlet and place a jumper across the two blades. Connect one lead of an ohmmeter to the jumpered AC plug, and touch the other lead to each exposed antenna terminal (UHF and VHF antenna terminals). The resistance must measure between 1M ohm and 5.2M ohm. Any resistance value below or above this range indicates an abnormality which requires corrective action.

LEAKAGE CURRENT CHECK

Plug the AC line cord directly into a 120 VAC outlet. (Do not use an isolation transformer for this check.) Use an AC voltmeter, that has 5000 ohms per volt or more sensitivity. Connect a 1500 ohm 10 watt resistor, paralleled by a 0.15 μ F 150 VAC capacitor, between a known good earth ground (water pipe, conduit, etc.) and all exposed metal parts of the cabinet (antennas, handle bracket, metal cabinet, screw heads, metal overlays, control shafts, etc.). Measure the AC voltage across the 1500 ohm resistor. The AC voltage should not exceed 750 mV. A reading exceeding 750 mV indicates that a dangerous potential exists. The fault must be located and corrected. Repeat the above test with the receiver power plug reversed.

NEVER RETURN A RECEIVER TO THE CUSTOMER WITHOUT TAKING THE NECESSARY CORRECTIVE ACTION.

PRODUCT SAFETY NOTICE

When replacing components in a receiver, always keep in mind the necessary product safety precautions. Pay special attention to the replacement of components marked with a \triangle in the parts list and in the schematic diagrams. To ensure safe product operation, it is necessary to replace those components with the exact same PARTS.

READING SHOULD NOT EXCEED 750 mV.
AC VOLTMETER
(5000 ohms per volt or more sensitivity)

SERVICING ELECTROSTATICALLY SENSITIVE DEVICES

Semiconductors (solid-state devices) that can be damaged by static electricity are referred to as Electrostatically Sensitive (ES) devices. Examples of typical ES devices are: Integrated Circuits (IC), Field-Effect Transistors (FET), and "chip" components. The following techniques should be observed strictly, to reduce the occurrence of semiconductor damage due to electrostatic discharge.

1. Immediately prior to handling any semiconductor component or an assembly containing a semiconductor device or devices, discharge the electrostatic buildup on your body by touching a known earth ground. You may also obtain and wear a commercially available discharging wrist strap device.

CAUTION: Be sure to remove the wrist strap before applying power to any unit being serviced.

2. After removing an ES equipped assembly, place it on a conductive surface, such as, aluminum foil, to prevent buildup or exposure to static electricity.
3. Use only grounded-tip soldering irons to solder or unsolder ES devices.
4. Use only anti-static solder removal devices. Some suction-type devices can generate static electricity adequate to damage ES devices.
5. A replacement ES device will come packaged in protective material (conductive foam, aluminum foil, or some comparable conductive material). Do Not remove an ES device from its protective packaging unless you are prepared to install it immediately.

6. Precisely prior to removing an ES device from its protective packaging, touch the protective packaging to the chassis or assembly in which the device will be installed.

CAUTION: Be sure that no power is applied to the chassis or circuit assembly.

7. Incidental body movements, such as, lifting a foot from a carpeted floor or the rubbing of fabric together can generate static electricity sufficient to damage ES devices. Therefore, minimize all body movements while handling exposed (unpackaged) ES devices.

SERVICE ADJUSTMENTS

GENERAL

This set has an On-screen Service Menu system included in the CPU that allows remote operation for most of the service adjustments.

ON-SCREEN SERVICE MENU SYSTEM

1. Enter the Service Menu:

- Turn off the receiver and disconnect the AC power supply.
- While pressing the Volume (\rightarrow) button on the television, reconnect the AC power supply. The Service Menu will now appear. The remote can now be used to make adjustments. See Figure 1 below.

ITEM NO.	TITLE	HEX DATA			
Index	ParameterName	Value	Def.	MIN	MAX
1	FACTORY_VOL	0x21	48	0	255

Figure 1. Service Menu Display

2. Service Adjustments:

- Press the Cursor \blacktriangle and \blacktriangledown key to select the desired service menu item you want to adjust. See page 4 for the On-screen Service Menu.
- Use the Cursor \blacktriangleleft or \blacktriangleright key to adjust the data. The \blacktriangleleft or \blacktriangleright key will increase or decrease the data sequentially.

3. Exit from the Service Menu:

- Press the **MENU** key to turn off the Service Menu display.

Volume – : Enter Service Menu

Menu:
Exit Service Menu

Cursor $\blacktriangleleft\blacktriangleright$:
Adjust the data

Cursor $\blacktriangle\blacktriangledown$:
Select Item

ON-SCREEN SERVICE MENU

Table 1. ON-SCREEN SERVICE MENU

When IC7600 (Flash Memory) is replaced, check the bus data to confirm they are the same as below. See page 3 for On-Screen Service Menu access and adjustments.

Index	ParameterName	Value	Min	Max
02	OP1	00h	0	255
03	OP2	0Dh	0	255

NOTES: Option 2 Data (Display Panel)

Option 1 and Option 2 data is initial and can be set according to adjustment information.

PROGRAM CODES

The microprocessor used in this model is a multi-purpose type and is used in several different models. To ensure proper operation and the correct features for your particular model, the program codes must be correct.

Note 1. Option Data 1 (Index 02) should be hexadecimal 00.

See Index 02 above. If this program code is wrong the TV will not operate properly.

Note 2. Option Data 2 (Index 03) should be hexadecimal 0D.

See Index 03 above. If this program code is wrong the TV will not operate properly.

POWER FAILURE CIRCUIT

Internal sub_CPU on main IC 5500 is programmed so the set will go to standby mode when there is circuit failure as described below. (Refer to "Block Diagram Power Lines".)

This unit is equipped with a Power Failure Detector function included in the sub_CPU which checks for an abnormal condition in the chassis power supplies.

If, while the power is on, a failure is caused by any of the following that results in a low voltage supply, the sub_CPU will turn the unit off in 1.5 seconds to prevent further damage:

- Failure within the power supply circuits.
- A short circuit in the load side from the supply.

Power Failure: Detected voltage failure for circuit.
(Connected to IC5500 pin W7.)

(Normal: High; Failure: Low)

If, while the power is off, the power is switched on and any of these failures remains uncorrected, the sub_CPU will shut off the power within three seconds.

Check the following if the unit is turned off by the power failure detector.

1. Disconnect the AC power cord (120V AC line) for a short time.
2. Connect a DC Voltmeter to the circuits shown below.
3. Press the Power key and check for the proper voltage supplies.
4. If any of these voltages is low, the power failure detector should turn the unit off within three seconds.
5. Check all circuits shown below.

Note: If power failure is detected 3 times in 15 minutes, the set will enter the standby mode and cannot be switched On. To reset the operating programs of the sub_CPU it is necessary to disconnect the AC cord for a short time.

MECHANICAL DISASSEMBLY

CAUTION:

This LCD TV uses several different kinds of screws. Using the correct screw is necessary to prevent damage. Lead wires must be redressed to their previous locations after servicing. The Earth sheet and gasket are provided to prevent interference to other radio and television receivers. The Earth sheet and gasket should be returned to its previous position after servicing.

STAND REMOVAL

Position TV face down on a padded or cushioned surface to protect the screen and finish.

Remove 4 screws (A:6X12) and remove the stand from the TV.

BACK CABINET REMOVAL

- CAUTION -

When the cabinet back is opened without following the procedure, the connector of LVDS and the power board might be damaged.

1. Remove 16 screws to take the back cabinet off.
(B:3x10, 9 pcs.; C:4x8, 4 pcs.; D:3x10, 2pcs.; E:3x6, 1pc.)
2. Detach AC cord from cabinet back.
3. Open the cabinet back from bottom side SLOWLY.
(Distance = 100 mm)
4. Remove cable from Power unit.
5. Open cabinet back more from bottom side.
(Distance = 200 mm)
6. Remove LVDS cable from Panel.
7. Detach cabinet back.

NOTE: Board and speaker are installed incabinet back.

POWER UNIT REMOVAL

Remove 6 screws (F:3x6) to take the power unit off.

MOUNTING REMOVAL

Remove 2 screws (C:4x8) to take the mounting panel off.

DEC IND REMOVAL

Remove the dec ind.

LCD PANEL REMOVAL

Lift up the LCD panel from front cabinet.

MECHANICAL DISASSEMBLY (Continued)

ANALOG BOARD AND MAIN (DIGITAL) BOARD REMOVAL

Remove 8 screws (B:3x10) to take the analog board and the main (digital) board off.

ATTENTION – The earth sheet should be returned to its previous position after servicing.

SPEAKER REMOVAL

Take off each speaker from back cabinet.

RC LED BOARD REMOVAL

Remove the RC LED board.

ATTENTION – Confirm that mounting wall wire is installed when install the back cabinet.

BUTTON UNIT REMOVAL

Remove the button unit.

TERMINAL BASE SIDE REMOVAL

TERMINAL BASE REAR REMOVAL

Remove 2 screws (E:3x6) and 2 special screws (G) and 1 special nut (H) to take the TERMINAL BASE SIDE and the TERMINAL BASE REAR off.

ELECTROSTATICALLY SENSITIVE DEVICES

Many solid-state devices (especially Integrated Circuits) are Electrostatically Sensitive, and, therefore, require special handling techniques as described under "Servicing Electrostatically Sensitive Devices," on page two in this service literature.

CHASSIS ELECTRICAL PARTS LIST

CAUTION: To Protect against electrical shock and for continued product safety, refer to SAFETY PRECAUTIONS and PRODUCT SAFETY NOTICE on Page 2.

PRODUCT SAFETY NOTICE

PRODUCT SAFETY SHOULD BE CONSIDERED WHEN A REPLACEMENT IS MADE IN ANY AREA OF A RECEIVER. COMPONENTS INDICATED BY A \triangle IN THIS PARTS LIST AND THE SCHEMATIC DIAGRAM DESIGNATE COMPONENTS IN WHICH SAFETY CAN BE OF SPECIAL SIGNIFICANCE. IT IS PARTICULARLY RECOMMENDED THAT ONLY PARTS DESIGNATED ON THE FOLLOWING PARTS LIST BE USED FOR COMPONENT REPLACEMENT DESIGNATED BY A \triangle . NO DEVIATIONS FROM RESISTANCE, WATTAGE, AND VOLTAGE RATINGS MAY BE MADE FOR REPLACEMENT ITEMS DESIGNATED BY A \triangle .

Note: Schematic part location numbers may not always match with the part descriptions.
The part descriptions are correct and should be used.

Schematic Location	Part No.	Description

CAPACITORS

NOTES:

Read description of the Capacitor as follows:

(Example)

Material:

- CERAMIC..... Ceramic
- MT-PAPER..... Metallized Paper
- POLYESTER..... Polyester
- MT-POLYEST..... Metallized Polyester
- POLYPRO..... Polypropylene
- MT-POLYPRO.... Metallized Polypropylene
- COMPO FILM.... Composite Film
- MT-COMPO..... Metallized Composite
- STYRENE..... Styrene
- TA-SOLID..... Tantalum Solid
- AL-SOLID..... Aluminium Solid
- ELECT..... Electrolytic
- NP-ELECT..... Non-polarised Electrolytic
- OS-SOLID..... Aluminium Solid with Organic Semiconductive Electrolytic

Schematic Location	Part No.	Description

RESISTORS

NOTES:

Read description of the Resistor as follows:

(Example)

Material:

- CARBON Carbon
- MT-FILM Metal Film
- OXIDE-MT Oxide Metal Film
- SOLID Composition
- MT-GLAZE Metal Glaze
- WIRE WOUNDWire Wound
- CERAMIC RES Ceramic
- FUSIBLE RES Fusible

SERVICE PARTS

"For Digital board replacement please get the correct assembly name/part number"

Service Name: ASSY,PWB,DIGITAL_Z-N8LA

Japan BOM part number: 1LG0B10Y09200

"For Analog board replacement please get the correct assembly name/part number"

Service Name: ASSY,PWB,PWR_ANALOG-Z6JE

Japan BOM part number: 1LG0B10Y0820A

NOTE: This is a sub-assembly (A201) from ASSY,PWB,ANALOG-COMP-Z6JE

"For RC_LED unit replacement please get the correct assembly name/part number"

Service Name: ASSY,PWB,RC_LED-Z6JE

Japan BOM part number: 1LG0B10Y0820B

NOTE: This is a sub-assembly (A202) from ASSY,PWB,ANALOG-COMP-Z6JE

SCHEMATIC NOTES

NOTES ON SCHEMATIC DIAGRAMS

1. All resistance values in ohms K=1,000 M=1,000,000.
2. Resistors specified with resistance value are "1/6DJ."
3. Resistors specified with type of resistor, tolerance and resistance value are "1/4."
4. Unless otherwise noted on schematic, all capacitor values less than 1 are expressed in μF (Micro Farad), and the values more than 1 are in pF.
5. All capacitors are 50 WV rating unless otherwise noted.
6. Unless otherwise noted on schematic, voltage reading taken with VOM from point indicated to chassis ground. Voltage reading taken using color-bar signal VHF channel 5, all controls at normal. Line voltage at 120 volts. Some voltages may vary with signal strength.
7. Waveforms were taken with color-bar signal and controls set for normal picture. Waveforms marked with an * may vary with signal strength.
8. The Symbol  indicates a fusible resistor, which protects the circuit from possible short circuits.
9. Parts enclosed with  are related with X-radiation.
10. Isolation border line. Cold Side  Hot Side

11. Schematic part location numbers may not always match the schematic symbols.
The schematic symbols and part descriptions are correct and should be used.
The part descriptions will be listed under the location number in the parts list.

ELECTROSTATICALLY SENSITIVE DEVICES

Many solid-state devices (especially Integrated Circuits) are Electrostatically Sensitive, and, therefore, require special handling techniques as described under "Servicing Electrostatically Sensitive Devices," on page two in this service literature.

SERVICE NOTES:

1. When replacing parts on circuit boards, clamp the lead wires to terminals before soldering.
2. When replacing high wattage resistors on circuit board, keep the resistor body 10 mm (3/8) from circuit board.
3. Keep wires away from high voltage and high temperature components.

PRODUCT SAFETY NOTICE

THE COMPONENTS DESIGNATED BY A  ON THIS SCHEMATIC DIAGRAM DESIGNATE COMPONENTS WHOSE VALUES ARE OF SPECIAL SIGNIFICANCE TO PRODUCT SAFETY. SHOULD ANY COMPONENT DESIGNATED BY A  NEED TO BE REPLACED, USE ONLY THE PART DESIGNATED IN THE PARTS LIST. DO NOT DEVIATE FROM THE RESISTANCE, WATTAGE AND VOLTAGE RATINGS SHOWN.

CAPACITOR AND RESISTOR CODE CHART

CAPACITOR (Example)

500	C	K	1500	B	
					Characteristics
					Value code
					Tolerance code
					Material code
					Voltage rating
					D ±0.5pF
					T +50% -10%
					J ±5%
					K ±10%
					M ±20%
					N ±30%
					P +100% -0%
					Z +80% -20%
					C ±0.25pF
					C Ceramic
					E Electrolytic
					F Polyester
					N Polypropylene
					T Tantalum
					K Ceramic
					H MT-Composite
					P NP. Electrolytic
					M MT-Polypropylene

RESISTOR (Example)

6	Y	K	4.7		
					Value code
					Tolerance code
					Material code
					Wattage rating
					D ±0.5%
					F ±1%
					G ±2%
					J ±5%
					K ±10%
					M ±20%
					F Fusible
					N Metalized Carbon
					S Oxide Metalized
					Y Wire Wound
					C Solid
					D Carbon Film
					W Wire Wound
